DEALERS ATTEND '84 F.U.N. SHOW WITH GUARDED OPTIMISM

BU Dollar Rolls Enjoy Strong Quantity Demand—Several at Slightly Higher Levels

The Market in Depth

ALLEN HARRIMAN

As we go to press, the first major numismatic event of the New Year is getting underway--the 1984 F.U.N. Show in Tampa, Florida (January 4-7). Traditionally, of course, this show tends to "set the pace" for at least the early weeks of the new year. Readers will remember that the '83 F.U.N. was an extremely active one---confirming that the "long slide" of mid-1980/mid-1982 was definitely at an end. After last year's show, prices increases were fast and furious during the following six months. The results of this year's show might well prove to be equally as indicative of things to come. Next week's issue will include a review of this important event.

Several teletype buyers are in the market for "slider" silver dollars. Quantities are wanted--with the stated qualifications being "well struck and relatively mark-free". The highest bid prices for individual dates have been compiled from a number of "want lists"---and are presented below. A quick examination will reveal that these bids for "sliders" are not simply a general percentage over the bid levels for AU specimens. In fact, they vary sharply from issue to issue--reflecting the perceived scarcity of "sliders" over AU's.

This Week's Market

CENTS: Offering of BU Lincoln rolls have been limited over recent days—probably due to the quiet holiday trading. And even a slight bit of below market bargain-hunting has been noted!

Flying Eagle cents are slightly lower in both MS-65 and proof-65 condition (now bid at $2200 and $5400 respectively); in MS-65, the 1859 copper-nickel Indian is lower at $2100/$2325 and the 1860-64 version has edged downward to $900/$1000.

NICKELS: Along with the Lincolns, the Jefferson series is apparently taking a breather. The next few weeks should point out whether those two series have "bottomed" or not. The Buffalo series is steady---with one dealer willing to pay a premium for exceptional BU rolls of 1938-D's.

A few more adjustments have been recorded by MS-65 type coins: Three-cent silver pieces (types One and Three) - $2200/$2450, "with rays" Shield nickels - $2400/$2650 and Shield nickels - $1200/$1350. Liberty nickels in proof-65 have slipped to $1050/$1175.

DIMES: A couple of serious bidders continue to search for BU Mercury rolls—indicating that they will pay "full bid" for choice original rolls of virtually all dates in the 1934-45 group. Bidding is light among the Roosevelts---with bargain-hunters dominating.

Large size Bust dimes in MS-65 are now pegged in an $8250/$9250 range—and the "no stars" Seated Liberty at $4500/$5000. Mercury dimes in strict proof-65 condition are slightly higher at $360/$400.

QUARTERS: Four advances have been registered by earlier Washington singles (in MS-65): 1932-P - $150, 1932-S - $1100, 1935-S - $280 and 1943-S - $50. Most of the other singles remain on "want lists" at current levels. As with the Roosevelts, the majority of bidding for BU Washington rolls falls into the not-so-serious category.

Twenty-cent pieces in MS-65 are now in a $5000/$5600 range; in proof-65 condition, the "no motto" Seated Liberty quarter is noted at $2850/$3150 and the 1873-74 "with arrows" version at $4900/$5400.

HALVES: Except for slightly lower ranges for the 1938-P ($550/$600) and the 1940-P ($240/$260), the Walking Liberty rolls and singles have been relatively firm over the past several days. Activity at the in-progress F.U.N. show and in the days following will most likely point the direction to be taken by this as well as other areas of the market during early '84.

Only two changes have been registered by "type.' in this area---one "up and one "down". The MS-65 Barber half is lower at $3250/$3600 and in proof-65 the Walking Liberty half is higher at $750/$835.

DOLLARS: Interest in BU dollar rolls remains high. Several issues have edged ahead---and at least a few bidders are willing to "pay a bit more" for quantities or for above average rolls. The singles in both series are steady at present levels---with "sliders" appearing on several buying lists (see "The Market in Depth").

PROOF SETS and MINT SETS: Virtually all of the 1964-82 proof sets have drifted slightly lower over the past two weeks. Quantities of most are available.

COMMEMORATIVES: Scattered minus signs will be found in the MS-60 and MS-63 columns. Trading remains light in both groups. It might be added that attractively (and originally) toned full MS-65's continue to fetch premium prices.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion ralated gold coins in this issue are figured on a basis of gold at $379.40 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63—but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary

GOLD AND SILVER BULLION CONTINUE TO SLIP LOWER

F.U.N. Show "Moderately Successful" For Most Dealers, BU Dollar Rolls Elusive

The Market in Depth

ALLEN HARRIMAN

The general consensus of the hundreds of dealers attending the just concluded F.U.N. extravaganza in Tampa was that the show was "moderately successful". There were those, of course, who didn't fare very well at all (and expressed the fact)---and there were also those who were "extremely happy" with the results of their journey to Florida. The majority fell somewhere in between. In other words, it was a relatively normal show.

Among the most sought after material was gem U.S. gold---especially, but not exclusively, the "type" issues. Prices were very strong for strictly graded specimens and the dealers who had hoped to return home with replenished stocks had to be satisfied with only a scattering of coins.

Also high on "want lists" were silver dollars. Gem MS-65 and better singles, of course, were in demand as usual---and the usual disagreements over grading were in evidence. But true MS-65's were selling well at bid or higher. Vying with this interest in top quality singles was strong demand for BU dollar rolls---particularly "above average" rolls. Those dealers who expected to locate quantities left the show with fewer rolls than they would have liked. And "premium" rolls regularly brought premium prices.

Though "MS-64" type coins were in abundance, specimens that both buyer and seller agreed were full MS-65 were far from plentiful. And those pieces which were available generally carried price tags commensurate with their quality. Not surprisingly, the "grading disagreements" surrounding gem silver dollars were evident in this area also!

The continual "slippage" of gold and silver bullion, of course, had its effect on activity at the show---but not nearly the strong effect that might have been expected. A substantial decline in bullion prices during the run of a major show, say, a year or two ago would certainly have had a much greater impact than was seen at this F.U.N. Show. This latest drop was more or less "taken in stride"---and, as a quick glance at this week's charts will show, much of the bullion-related material has yet to respond.

This Week's Market

CENTS: BU Lincoln rolls remain in the doldrums. At this point, any dealer who needs a specific roll or rolls will prohably have little difficulty in finding them. (This doesn't mean, however, that less than top quality rolls might not be received.)

NICKELS: Except for continued interest in "high quality" BU rolls of 1938-D Buffalos, little bidding for any nickel rolls is being registered. Sellers, too, are relatively scattered--- perhaps seeing no advantage in selling into the current market.

The rare 1916/16 "double die" Buffalo nickel regularly appears on teletype buying lists---usually with requests for quotes. None have been located.

DIMES: Both the Mercury and Roosevelt series are quiet---with prices unchanged this week. There are buyers—but, as in many other areas, they are waiting to "pick off" any bargains that might float by. The late BU silver rolls are, as of yet, steady in the wake of falling bullion levels.

QUARTERS: The "type two" Standing Liberty quarter in full head MS-65 condition has moved to a higher $1150 bid---with one major buyer willing to pay even more for the "right" specimens. (Strictly full head gems are not easy to find; many of the pieces offered are of the "3/4" or "7/8" head variety---or they have problems which keep them out of the 65 category.)

Active hidding--at current levels---continues for most of the 1932-40 Washington singles; the BU rolls are nearly unchanged in light trading.

HALVES: A number of further minus signs will be found on the Walking Liberty chart this week. Among the earlier singles, the 1934/37-P mints, 1938-D and 1939-PDS issues are lower---and among the "short set" rolls, the 1941/46-P mints, 1946-D & S and 1947-D have followed this trend. Two Franklin rolls have edged slightly higher (1948-P, 1957-P); trading has "picked up" just a bit across the series---at or near current levels.

DOLLARS: Demand for "nice original" BU dollar rolls remains high---and it is apparent that the present floating supply is not equal to this demand. (Most of the major quantity buyers who attended the F.U.N. show in hopes of locating bag and/or multi-bag quantities were disappointed.) The drop in the price of silver bullion hasn't yet affected circ dollar bags; the high teletype bid remains $11,000. Gem MS-65 singles continue to command bid, ask or more---but "just miss" pieces do not!

PROOF SETS and MINT SETS: Virtually all of the 1960-81 mint sets have edged lower this week---with quantities of most available. The later proof sets, too, remain in a weak position; "mixed lots" can be located at discounts from last week's lower levels.

COMMEMORATIVES: Again, scattered minus signs will be found in the MS-60 and MS-63 columns of the silver charts. Especially affected are the BTW and W-C issues. (It should be remembered, however, that the majority of PDS sets offered as "MS-65" are optimistically graded. True MS-65/better specimens in these two series are very scarce.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $366.20 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

AU: Will have minor bag marks or very slight wear on the high points of the design. These are well above average uncirculated pieces.

MS-60: Will have numerous bag marks and scratches and may be dull or lackluster.

MS-63 (TEM UNCIRCULATED): Will be sharply struck and have full luster (but not original toning). MS-65's are only a small but varying percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE): Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 -but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck -and virtually perfect in all other respects Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary

BU SILVER DOLLAR ROLLS IN DEMAND; PRICES ADVANCE

A Comparison of Current Type Coin Prices With Those in Effect One Year Ago

The Market in Depth

ALLEN HARRIMAN

With this issue we present a comparison of current bid levels for all MS-65 and Proof-65 type coins with the levels which were in force at the beginning of 1983.

Although the rapid escalation experienced during approximately the first half of last year has settled down considerably---and some profit taking has been registered, the overall yearly gains turned in by most issues are none the less quite impressive. Take a look at the following charts:

JANUARY '83
MS-65 TYPE COINS

ISSUE	BID Jan 7, '83	CURRENT BID	% GAIN (over past year)
Half Cents - Draped Bust	2,700	4,500	+ 67
Half Cents - Classic	1,700	2,250	+ 32
Half Cents - Braided	1,800	2,350	+ 31
Large Cents - Draped Bust	8,500	11,500	+ 35
Large Cents - Classic	15,000	16,000	+ 07
Copper-Nickel Cents (1859)	1,375	2,100	+ 53
Copper-Nickel Cents (1860-64)	600	900	+ 50
Indian Head Cents	240	360	+ 50
Three-Cent Pieces - Nickel	675	1,050	+ 56

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) A coin with many contact marks, hairlines and/or abrasions showing evidence of bagging or handling; however, no further post-strike damage is necessary. It will be bag marked and its sharply struck mint luster will be dull or lackluster.

MS 63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full lustar (brilliant or original toning). MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 --but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 --but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

CARTER SALE BRINGS STRONG PRICES

Silver Dollars and Gold Coins Were Highlights of The Auction

The Market in Depth

ALLEN HARRIMAN

The coins of Amon Carter, Jr. were sold at public auction by Stack's in New York on January 18 thru 21. The sale was highlighted by many major rarities in the silver dollar and gold coin series. In fact, this was only the second time in numismatic history that a complete set of U.S. silver dollars was sold at auction. The only other time this has happened was at the Will W. Neil Sale in 1947. And, in fact, many of the dollars in this sale were originally purchased in the Neil Sale.

Before we take a look at the prices realized for the silver dollars and gold coins, there are a few significant prices from some other series that deserve mentioning:

1853/2 25¢	MS-65	$11,000
1917-P T1 25¢	MS-65	$ 1,650
1917-P T2 25¢	MS-65 FH	$ 1,650
1919-P 25¢	MS-65	$ 770
1929-D 25¢	MS-65 FH	$ 2,200
1836 R.E. 50¢	PR-63/65	$10,450

But, of course, it was the Carter silver dollars that drew collectors and dealers from all over the country. The Bust dollars included many of the finest known examples and all of the "biggies." Here are some of the highlights:

1794	MS-65	$265,000 (new record!)
1795 Small Eagle	MS-60	$ 24,200
1802	MS-63	$ 33,000
1801	Proof!	$ 55,000
1802	Proof!	$ 60,500
1803	Proof!	$ 68,750
1804	XF	$198,000

The trade dollar section of the Carter dollar collection included the ultra-rare 1884 and 1885 plus several exceptional condition examples which, not surprisingly, brought exceptional prices. Here are the trade dollar highlights:

1874-CC	MS-67	$ 10,450
1875-CC	MS-65+	$ 10,450
1875-S	MS-67+	$ 12,650 !!
1884	PR-63	$ 45,100
1885	PR-63	$110,000

The Morgan dollars in the Carter Sale included several finest known examples and even "common" and "semi-common" dates were bringing record prices if they were in uncommon conditon. A few of the Morgan dollars highlights include:

1881-S	MS-65	$ 286
1881-CC	MS-65	$ 1,045
1884-O	MS-65 PL	$ 1,045 !
1887-P	MS-67	$ 715
1887-O	Proof !	$19,800
1890-O	MS-65 PL	$ 8,800 !!
1891-O	MS-65 PL	$10,450
1892-O	MS-65 PL	$13,750
1893-O	MS-65	$14,300
1893-S	MS-65	$57,750
1893-CC	Proof	$26,400
1895-S	MS-65 PL	$16,500
1921-D	MS-65	$ 2,310

Highlights of the regular issue gold coins included:

1857 gold $1	MS-67	$ 7,150
1859 gold $1	MS-65+	$ 7,425
1872 gold $1	MS-65+	$ 7,700

1861 $20	PR-65	$ 46,750

1931-D $20	MS-63	$ 26,400
1932-P $20	MS-65	$ 26,400

There was also an extraordinary offering of rare territorial gold in the Carter sale. A few highlights:

1855 Kellogg $50	Proof	$154,000
1861 Dunbar $5	XF	$ 60,500
1850 Dubosq $10	Fine	$ 38,500
1855 Wass Molitor $20 (large head)	VF	$ 40,700
1849 Mormon $20	VF	$ 35,750
1849 Mormon $10	AU	$132,000

Finally, an incredibly rare 1843 U.S. proof in the original mint case and including the three gold issues brought $132,000!

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $366.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum
Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS 65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) Will exhibit the same characteristics as the MS 65 but with the additional feature of deep mirror prooflike surfaces both sides

MS 67 & MS 67 PROOF LIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS 63 but may also include MS 65 examples of the issues more easily located in this condition. For strictly MS 65 single sets use prices for individual issues as listed in the Monthly Summary

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newslatter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63—but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

BULLION RALLIES AND COIN MARKET HEATS UP

Silver Dollars and U.S. Gold in Great Demand

The Market in Depth

The gold and silver bullion markets staged major rallies with gold up more than $10 per ounce and silver up 41 cents. This strengthening of the bullion markets added fuel to the coin market recovery. After a solid year of price increases the coin market apparently ran out of steam last August and prices in many areas dropped this Fall. But this year started with many prices in a general uptrend. Add the renewed activity in the bullion markets and you can see how the stage was set for some hectic activity.

The recently concluded Long Beach coin show saw some of the above mentioned hectic activity. The Long Beach coin show is held three times a year (February, June and October). These shows are always among the year's biggest and most important. The Long Beach shows are generally a good indicator of current market activity and an excellent barometer of things to come. The most recent Long Beach coin show drew great response from both the public and the dealers. Most dealers reported sales which exceeded their expectations. Also on the positive side were the dealer reports of a general lack of quality material. Many dealers left the show with unfilled orders and want lists.

The two strongest areas of the coin market, as witnessed by action on the teletype and at the Long Beach show, are BU silver dollars and U.S. gold coins. Silver dollars are now in demand in every "shade" of uncirculated. BU dollar rolls are the source of constant teletype activity and action in this area was definitely heated at the Long Beach show. Gem MS-65 dollars are also receiving their share of attention as several major buyers are now running daily teletype messages offering to pay bid or more (see page five) for nearly all issues. Prooflike dollars are also in demand though the supply of two-sided, deep mirror Gems is extremely limited. All U.S. gold coins are in great demand with action centered on the "bullion related" XF through MS-60 grades. Premiums (over actual melt value) for many coins are now at all-time highs. And it should be noted that there are buyers for all MS-65 and Proof-65 gold issues.

This week we'll continue our look at 1983 price performances with an analysis of last year's action in the BU dollar roll market. Note that there are higher bids now in effect (see page five).

This Week's Market

CENTS: BU Lincoln rolls are very soft and several long selling lists at lower levels failed to stir up any buyer response. The minus signs cover the spectrum from the very tough rolls (1935-D, 1939-D, etc.) to the fairly common issues (1954-S, 1955-D, etc.). In the type coin market MS-65 Large cents are bid at a higher $2200 and buyers are also interested in Gem Indian cents and Half cents.

NICKELS: With the exception of the wartime issues, activity in BU Jefferson rolls was extremely slow this week. There is one buyer who will take all BU War nickel rolls at or near current bid levels. The rare 1943/2 nickel is now at lower levels in grades XF thru MS-65 and buyers just don't seem to be interested.

DIMES: Rising silver prices have stirred up interest in the late date Roosevelt rolls. The low mintage 1955-P roll was bid at a higher $100 while its companion issue, the 1955-D, moved to a new bid of $62. The 1960-P and 1960-D rolls are wanted in quantity at the new bid of $50. Reports from bourse floors indicate that full band Mercury dimes are still quite soft.

QUARTERS: The early Washington issues are still quite active. Several issues moved up this week in MS-65 and MS-63 (see page two). The later rolls have sparked up considerably. The 1955-D roll is now wanted at a new bid of $167.50. The 1961-P roll is in demand with a higher bid of $95 now in force.

HALVES: Late date Franklin rolls are showing higher bids this week. The 1961 thru 1963 rolls are all higher along with the popular 1955-P roll.

DOLLARS: Both dollar rolls and MS-65 dollar singles surged forward this week. The red hot Carson City issues are now leading this surge with the 1878-CC bid at a higher $360, the 1880-CC moving to $600, the 1881-CC is now $450, the 1882-CC is $250 and the 1883-CC and 1884-CC are bid $220 each in MS-65 condition.

PROOF SETS and MINT SETS: Proof sets were stable yet quite active this week. There were reported large transactions at the Long Beach show involving the early (1936-42) issues. The late date "silver" Mint Sets (1959-64) edged forward this week.

COMMEMORATIVES: Looking at the Commem charts one would surmise that this area of the market is pretty slow. Actually, the opposite is the case with considerable buying and selling being done at current levels. One dealer is offering to pay premium prices for all "MS-65+" silver commems and indeed some recent auction results in this area have been quite impressive.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $381.80 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63- but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

SILVER DOLLARS SURGE AS MARKET REMAINS ACTIVE

1983 Rare Gold Performances Analyzed

The Market in Depth

Morgan and Peace dollars now head many dealer want lists. Numerous bidders are now running daily buy lists for all silver dollar rolls. The focus is on nice "original" rolls. Below average, "put together" rolls will not command the new higher prices. Gem MS-65 dollars are also in demand with lengthy buy lists now appearing on a daily basis. In fact, teletype dealers are using phrases such as "desperate" and "urgent" and even some unmentionable phrases to describe their current need for Gem silver dollars. It should be noted that lengthy buy lists for MS-65 Prooflikes are also appearing regularly.

The following is the last in our series of analysis of 1983 price performances:

This Week's Market

CENTS: This was another week of light trading for BU Lincoln rolls. Copper type coins are now in demand, especially the high quality (MS-65 or better) examples. Both the Classic and Braided half cents are bid at higher levels in MS-63 and MS-65. Two cent pieces in MS-65 are now bid at a slightly higher $1300.

NICKELS: Things were also pretty quiet in the Buffalo and Jefferson series. The 1943-D roll is down a notch to a new bid of $105.

DIMES: Mercury rolls were fairly quiet and, in fact, the 1941-45 roll set posted a lower bid level of $10,500. Roosevelt rolls, on the other hand, are quite active. Most of the bidder attention seems to be focused on the later silver rolls, particularly the 1955-P D & S, 1960 P & D and 1961 P & D.

QUARTERS: Late date silver Washington rolls are receiving their share of bids, too! The "hot" 1961-P roll is bid $5 higher at $100. Early Washingtons are still in demand. This week the 1937-S is bid at $325 in MS-65 and several issues are higher in MS-60 and MS-63 (see page two). Standing Liberty quarters have been very active now $425 for MS-65 non-full heads.

HALVES: Several bidders are now in the market for quantities of MS-65 Walkers. Rising silver prices have increased attention on the later Franklin rolls. Several rolls have higher bids this week and any Franklin roll will now bring at least $140.

DOLLARS: Silver dollar action has been hot and heavy for several weeks now. Any common date (except 1921) Morgan is now in demand at a higher bid of $835. The 1921 is now bid $650 while common Peace dollar rolls move up $10 to $610. Several Morgan issues posted higher bids in MS-65 and MS-65 Prooflike (see page five). Ike dollars have also been getting into the act. All the "Blues" and "Browns" are wanted in quantities and the 1972 Brown is bid at a higher $8.40 while the 1973 Brown moved up to $60.

PROOF SETS and MINT SETS: Late date proof sets suffered numerous minor losses this week. Most of the 1970 to 1983 issues were lower. The 1983 S-less set dropped $25 to a bid of $625.

COMMEMORATIVES: Silver and gold commems are both fairly active at current levels. Most of the action appears to be centered on the lower end, i.e. the XF/AU and MS-60 grades. Several silver issues were bid at higher levels in XF/AU (see page two).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $377.20 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereceristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck ---and virtuelly perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of aech coin. They range from very scarce to unknown according to dete.

Prices for single BU sets end BU roll sets in this chart are for "typical" coins. These usuelly average MS-63 but may also include MS-66 examples of the issues more easily located in this condition. For strictly MS-66 single sets, use prices for individual issues as listed in the Monthly Summary.

Premiums for U.S. Gold Coins at All-Time High

The Market in Depth

Premiums for numismatic, i.e. 1933 and before, U.S. gold coins are now at an all-time high! The premium refers to the price of a coin above and beyond its intrinsic bullion value. One coin that's been tracked by gold traders for years now is the $20 Saint Gaudens. Using the bid price for the most actively traded grade (MS-60), you can arrive at the $20 Saint Gaudens premium figure by first multiplying the price of gold by .9675 (the gold content of all Saint Gaudens). Using a gold spot of $385.60 you'd get a bullion value for a Saint Gaudens of $373.07 ($385.60 x .9675). You then divide the MS-60 bid price by the value ($735 divided by $373.07) and you get the premium (1.97 or 97%). Premiums for the Saint Gaudens have traditionally (the past twenty years) fluctuated between 30% and 40%. Starting in June of 1983, premiums started jumping as new IRS bullion trader regulations stirred investor interest in the non-regulated U.S. gold. Now that the bullion markets are trading higher, premiums have increased even more. Here are some historical highlights of MS-60 Saint Gaudens premiums:

Year	Bullion Price	Saint Gaudens Premium
1965	$ 35	47%
Dec. 1974	$199	49%
Jan. 1979	$220	40%
Jan. 1980	$820	19%
June 1982	$300	32%
June 1983	$400	50%
July 1983	$420	70%
Current	$385	97%

Other premiums for frequently traded numismatic gold are as follows:

Coin	Grade	Current Premium
$20 Lib	MS-60	67.5%
$20 Lib	XF	38.6%
$10 Ind	XF	121.4%
$10 Lib	XF	42.6%
½ 5 Lib	XF	80.1%

This Week's Market

CENTS: Several of the late date Lincoln rolls, including proofs, were lower this week. The 1970-S Proof edged down to a bid of $36 while the 1968-S, 1969-S, 1971-S and 1972-S Proof rolls are now bid at $35. The 1970-P roll is bid at a lower $9 and the 1973-S roll slipped to $1.10. There's not a lot of activity in this market at the moment. Copper type coins are still very much in demand. Gem "red" MS-65 Indian cents are now bid $400. Even the lower grades are getting into the act. Draped Bust half cents are now bid $22.50 in Good, and Classic and Braided heads are also up in Good (to $19 and $22.50 respectively). Draped Bust large cents are bid $19.50 in Good and Classic heads are up a notch to $24.

NICKELS: No changes at all in the BU Jefferson and Buffalo roll market, as activity is extremely light in this area. Type coins are another matter altogether! Leading the nickel type coin want lists is the Proof-65 Liberty nickel at a higher bid of $1100.

DIMES: Mercury roll activity is still very limited. Full band Mercs remain very soft (see lower bids in the Monthly Summary). Roosevelt roll activity is lead by the "hot" late date silver issues. The 1958-D roll wins this week's award for "most wanted" dime roll. Several of the late date clad rolls have slipped considerably (see page three). These issues had a good run-up about nine months ago and these coins can be surprisingly tough. However, with the clad rolls it seems to be a paradoxical case of them being hard to find when you need them and hard to sell when you have them. In the type arena, both Seated and Barber dimes are bid at a higher $2000 in Proof-65 condition.

QUARTERS: Early Washington singles continue to be the focus of lengthy buy lists. They are wanted in MS-60, MS-63 and MS-65 condition! So far the only higher bid is for 1942-S MS-65 singles (now $75). The late date silver rolls are just as "hot" as the dimes (see page three). Again the 1958-D roll seems to be attracting the most attention. Full head Standing Liberty quarters are now bid $1300 in MS-65 condition. Check the Monthly Summary for the extensive gains posted by this series. Also note that the very rare, key date 1916 Standing Liberty quarter has edged lower in several grades due to last month's prices realized at an auction of a "mini-hoard" of this date.

HALVES: Walking Liberty rolls softened up this week. The "common" P-mints are now bid $1500 and several other issues are also lower (see page three). In direct contrast, there are now several dealers running lengthy buy lists for all 1934 to 1947 MS-65 singles. This is no doubt in sympathy with the overall heating up in the market for gem quality coins. Franklin rolls are also in demand. Many of the less expensive rolls are slightly higher this week (see page three). Half dollar types also saw some new buying activity with Proof-65 Barber halves moving up $100 to a new bid of $3500.

DOLLARS: The silver dollar market is still the hottest area in the numismatic marketplace (numismatic gold is a close second see "The Market In Depth"). On pages four and five you will find plus signs ranging from the circ grades all the way thru MS-65. Dollar rolls are also very active. Any common date pre-1921 Morgan roll is now bid $850, while common Peace dollar rolls (1922-P and 1923-P) moved to $625. Note that the 1921-P Morgan roll is quite active with bids ranging in the $650 to $675 area. Ike dollars are also in demand, though prices did not move this week.

PROOF SETS and MINT SETS: There were no changes in Proof set prices this week and there were only minor changes for mint sets. Most of the issues are now trading quite actively at right around the bid prices. The later proof sets are still a little soft, while dealers report that the early (1936-42) sets are now "quick sellers."

COMMEMORATIVES: This market has been quite active at recent shows and auctions, but as yet there is very little teletype time devoted to commemoratives. The silver issues were basically unchanged this week. The super tough and important Isabella quarter jumped up to a new bid of $1650. The 1933-D Oregon was substantially lower in grades MS-60 thru MS-65. This was a result of a recent auction sale of a "mini-hoard" of this low mintage issue. For the past year or so the 1933-D has been priced at 30% to 40% more than the equally rare 1936-S. It seemed like just a matter of time before the market corrected this disparity with a rise by the 1936-S or a decline by the 1933-D. Apparently the marketplace is choosing the latter solution.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $385.60 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They renge from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

GOLD BREAKS $400 BARRIER

Mid-Winter A.N.A. Show Sees Strong Market Activity

The Market in Depth

The important Mid-Winter convention of the American Numismatic Association was held in Colorado Springs last week. Reports from attending dealers indicate strong buying activity. The "hottest" areas were silver dollars and all U.S. gold. $20 Saint Gaudens were particularly in demand. The majority of the dealers reported that their show sales were "better than expected." The most frequent complaint about the show was that there wasn't enough quality material available to satisfy dealer needs.

Another successful A.N.A. Auction was held by Heritage Numismatic Auctions. Some of the highlights of the sale included:

1853 Arrows 10c	MS-65	$5,060!
1941 10c	PR-67	$ 440
1880 25c	MS-67	$4,840
1881 25c	PR-67	$3,850
1941 50c	PR-67	$1,210!!
1876-S Trade $1	MS-67	$4,730
1901-O $1	MS-67	$1,100!
1903-P $1	MS-67	$ 742
1916-S $5	MS-63	$7,150
1907 XM $20	MS-67	$3,520

The only disappointing area of the auction was the expensive gold coins. For example, the 1920-S $10 (grading MS-63) brought only $17,600 and the rare Proof-65 1915 $20 fetched only $25,300. There was definitely a lack of "wonder coins" on the bourse floor, so there's no long list of "wonder prices" to report. There were a few stratospheric transactions though. An 1881-CC dollar in MS-65,67 PL traded between dealers at $1,700. A non-prooflike MS-67+ 1897-S dollar brought $2,000! And a superb original roll (20 coins) of 1928 $20 Saint Gaudens was broken up with dealers paying between $2,000 and $3,000 per coin.

This Week's Market

CENTS: Buyers for BU Lincoln rolls are still few and far between. Prices for early rolls held steady this week (there is actually very little buying or selling being done). The 1962 to date rolls have dropped considerably (see page three). Copper type coins are still in great demand with daily buy tapes now being run for virtually every issue.

Proof-65 Two cents have moved up to a bid of $2400 with Proof-63 examples now old at a higher $750.

NICKELS: Like the Lincoln rolls, the earlier Jeffersons are really quiet while the 1961 to date issues dropped to lower levels (see page three). Buffalo rolls are relatively stable.

Actually, the only rolls that trade frequently are the 1937-P and 1938-D. The 1935-P, 1936-P & D and 1937-D & S are occasionally seen, but all of the other rolls are now very rare.

DIMES: Roosevelt rolls are now in demand. All issues are actively being sought by quantity buyers. The focus is still basically on the later silver-related rolls, but even earlier issues had their share of plus signs this week (see page three). The Mercury roll market remains relatively quiet.

QUARTERS: Changes in the Washington series were limited to the later rolls this week. However, there are bidders interested in all rolls and all early singles from this popular series. BU Barber quarters are now bid $575 in MS-63 and $1900 in MS-65.

HALVES: After last week's drops, BU Walker rolls are apparently steady at the new levels. There are now several bidders interested in quantities of all MS-65 1934 to 1947 halves. Franklin rolls are also on the move (check the gains on page three). Proof-65 Seated halves were up a notch with bid going to $3300 for the "with motto" type and $3500 for the "no motto."

DOLLARS: Dollar hunting is now a major activity for most dealers. There are now frequent teletype buying messages for nearly all dates and rolls. Buyers want Gem MS-65 singles, MS-65 Prooflikes and any original rolls. At auctions and on bourse floors and the teletype, silver dollars now have the center stage. Ike dollars are still very active, though there was no price movement this week.

PROOF SETS and MINT SETS: There were a few minor changes in the proof set market this week. The early issues have softened a little and bid on the 1938 set dropped to $1500, while the 1939 set moved to a lower $1325. The 1983 S-less set slipped a notch to a new bid of $600. The 1959 to 1964 mint sets were up again this week (see page five).

COMMEMORATIVES: The commemorative market has taken somewhat of a back seat to the current major buyer interest in dollars and gold. Dealers reported a slackening of demand at the Mid-Winter A.N.A. However, there are now several bidders for all gold commemoratives in all grades.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $401.80 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (Very Fine AU Barely uncirculated - shows no evidence rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck; may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks; may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 (PROOFLIKE CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 –but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck –and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 –but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

GOLD, TYPE AND DOLLARS ARE ALL MOVING

Teletype Buyers Now Outnumber Sellers

The Market in Depth

Buying activity on the teletype circuit has increased dramatically in the past several weeks. In slow markets buyers are usually few and far between. Any buy tapes you see are directed at very specific needs. You seldom see the lengthy date by date buy lists. Selling tapes predominate in slow markets. In strong markets, as is apparently the case now, buy tapes outnumber sell tapes. In general, the more buying and less selling you see on the teletype, the stronger the market. Currently, buy tapes are long and frequent while sell tapes are short and infrequent. So, on the basis of teletype activity, the market is indeed very strong.

Type coins have joined in on the action this week. As usual, the emphasis is on the top quality examples. i.e. MS-65 and Proof-65. The demand for all quality numismatic material now far exceeds the supply. The type coin market is an excellent example of this. There are three or four very large investment orientated firms that are each willing, in the words of one company head, to "buy every gem type coin I'm offered that's anywhere near reasonable in price." Add the needs of the dozens of type coin specialists to these three or four seemingly "bottomless pits" of demand and you can see how heated the competition for quality coins has become.

Activity in the silver dollar market can only he described as hectic. Many roll dealers are now complaining about the suddenly dried up supply. This is a significant development since the dollar roll market is one area where supply has not been a problem in the past.

Several roll buyers are now trying to buy single BU dollars. bidding $40 and up for Morgans, $30 and up for Peace dollars and $55 dollars and up for single S-mint dollars. The demand for gem MS-65 singles is just as strong. For example, there are now three major buyers running hourly buy tapes for nearly every issue in the Morgan and Peace dollar series. Again, these guys are quantity buyers and they aren't the only buyers. The demand for all quality numismatic material is very deep.

But more than type coins, and even more than silver dollars, the rare coin market has gold coin fever!!! All U.S. gold coins are wanted by literally hundreds of quantity buyers.

If one coin wins the "most wanted" award it is the $20 St. Gaudens. Bid for MS-60 Saints has now passed the $800 level and is closing in on the all-time high of $940 (January 18, 1980). Since January, gold bullion has gone up $30 an ounce and the hid for MS-60 $20 Saint Gaudens has gone up $150! There are also quantity buyers of MS-65 Saints and truly superb examples have traded hands for as much as $3000. And all other U.S. gold types, including gold commems, are wanted in all grades.

This Week's Market

CENTS: Several of the late date Lincoln rolls drifted lower again this week. Copper type coins are in demand, especially full red gems. Bid for MS-65 Large cents moved up $100 to $2300. Common date Indian cents are now bid $75 in MS-63 and $425 in MS-65.

NICKELS: There was very little nickel roll action this week. A few of the inexpensive late dates were lower. Nickel type coins are now included in current type coin buy lists. Proof Three cent nickels are bid at a higher $475 in Proof-63 and $1350 in Proof-65.

DIMES: While there were no changes in BU silver dime rolls (Mercs and Roosevelts), there are still daily buying attempts at current levels. A few of the later date, non-silver, Roosevelts have slipped lower. Common date Seated dimes are now bid $425 in MS-63 and $1500 in MS-65. Barber dimes in MS-65 edged up $25 to a new bid of $975.

QUARTERS: Like the dimes, Washington rolls are in demand at current levels. The early singles (1932 to 1940) are wanted in grades MS-60 to MS-65 (see page two). The 1942-S, the key date to the 1941 to date Washington set, is now bid at a higher $80. Barber quarters are up again in MS-65, as bid is now $2000.

Gem MS-65 Standing Liberty quarters are still in demand. Buyers are interested in the strictly graded, no "rub" on the knee, Standing Liberties.

HALVES: Daily buy lists for all 1934 to 1947 MS-65 Walking Liberty halves are now appearing on the teletype circuit. Dealers also report that supplies of this popular and usually available series have dried up at the coin shows. The 1934-P is up a notch to a bid of $520. The 1935-P and 1937-P are now bid $300 each, while the slightly more common 1936-P has moved up to $290. Franklin rolls are still in demand. "No motto" Seated halves are now bid $975 in MS-63 and $3550 in MS-65. The "with motto" variety moved to $925 in MS-63 and $3300 in MS-65. Proof Barber halves are higher in both PR-63 and PR-65 (bid $1150 and $3600 respectively).

DOLLARS: Any pre-1921 Morgan dollar roll is now bid a minimum of $890 with several bidders at even higher levels. The red hot S-mint rolls are bid as follows: 1878-S is now $1350, 1879-S is $1275, 1880-S and 1881-S are now $1225 and the 1882-S is bid $1300. Gem singles are also getting their share of attention. Check the rash of plus signs on page five! The 1973-S Brown Ike is bid at a slightly lower $59, but trading in this series is very brisk.

PROOF SETS and MINT SETS: The "silver sets" are on the move again. The 1956 proof set is bid at a higher $26.50, while the 1958 set moved to $22.50. The 1961, 62 and 63 sets are now bid $13.25. The earlier sets are relatively quiet.

COMMEMORATIVES: Superb silver commemoratives, i.e. MS-65 plus, have been trading at healthy premiums at recent coin shows, particularly if the coins are attractively toned. As yet, there's not a lot of action on the teletype for the more "commercial" grades (MS-63 and MS-65). Gold commems are being actively sought in all grades.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $404.50 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) Will exhibit the same characteristics as the MS-65 --but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOF LIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets use prices for individual issues as listed in the Monthly Summary

BUYERS STILL OUTNUMBER SELLERS IN STRONG MARKET

Buyers Want "Original" Rolls of Dollars

The Market in Depth

For some time now BU dollar roll buyers have made a distinction between "original" and "put together" rolls. It's, therefore, appropriate to examine and define the difference in these two types of frequently traded silver dollar rolls. All silver dollars were originally released by the Mint in sealed bags of 1000 coins each. So, technically, all rolls are "put together," since the U.S. Mint didn't release silver dollars by the roll. However, the coin industry has generally accepted connotations for the terms "original" and "put together" when used to describe silver dollar rolls. In general, "original" connotates higher quality than "put together" and the demand for "original" rolls is always higher. Consequently, "put together" rolls usually sell for some sort of discount. It should be noted that you could "put together" a roll of 20 MS-65 coins which would, obviously, be worth much more than an "original" roll of MS-60 or MS-63 coins. But, when speaking of "put together" rolls, dealers usually are referring to the practice of buying 20 single dollars to make up a roll.

To further clarify these terms we asked some of the big market-makers in BU dollar rolls how they defined "original" and "put together." You may be surprised by the consistency of the answers:

Steve Contursi (Miller-Contursi, Inc.)

"Original rolls have coins with similar strikes and color. All of the coins in a original roll came from the same bag or group of bags. Original rolls don't necessarily have MS-65 or even MS-63 coins. The quality and value of a put together roll depends entirely on the coins involved. The premium/discount factor has started to disappear, providing, of course, that all the coins in a roll are BU coins. Single average quality BU silver dollars usually sell for less than the pro-rated roll price because of the labor involved in buying 20 single coins to make up a roll."

Casey Noxon (Royal Coins)

"Original rolls are exactly as pulled out of a bag, as opposed to the case of someone going out and buying 20 single coins to put together a roll. Original rolls means uniform quality. A put together roll could be nicer, but most likely not. Put together connotates lesser quality and a little discount in price."

Tom Tkacz (Glen Rock Coin Shop)

"Original roll means unpicked and not dipped (cleaned). They can be MS-60, MS-60+ and sometimes MS-63. Buyers really don't expect any MS-65 coins in original rolls. Put together usually means lower end quality and probably dipped coins, especially for put together Peace dollar rolls."

Joe Buzanowski (James U. Blanchard & Company)

"Original rolls came out of original bags. The coins should have the same color and strike, i.e. all the coins should have the same basic appearance. Grade is a separate issue. Put together rolls usually have the premium quality coins picked out. The coins in put together rolls are different in appearance."

Dennis Wegley (Investment Rarities)

"An original roll is 20 uniform coins which came out of the same bag. The coins have the same strike and die characteristics. Some dates, such as 1889-P and 1896-P, are very seldom available as original rolls. They are usually only found in put together form. This suggests that original bags of these dates are extremely rare."

This Week's Market

CENTS: Some of the BU Lincoln rolls drifted lower, as this area remains very slow. It should be noted that full Red, Gem examples of the early dates are reportedly selling very well.

NICKELS: There were some lower prices (see page three) for BU Jefferson rolls this week. Three cent nickels are now bid $1000 in MS-65, while Proof-63 and Proof-65 bids moved to $500 and $1400 respectively.

DIMES: Dime roll action stabilized a little, as silver prices were slightly lower. Demand is still very strong at current levels. The first buy tapes for full band Mercury dimes we've seen in quite awhile appeared this week. MS-65 full band dime prices dropped considerably during the past four months). MS-65 Seated Liberty half dimes (with legend) moved up $50 to a new bid of $1800.

QUARTERS: BU quarter rolls are still in demand at current levels. MS-65 examples of the early Washingtons were up substantially (see page two). Both Liberty Seated and Barber quarters are now bid at a higher $2600 in Proof-65. MS-65 and MS-65 Full Head Standing Liberty quarters are also in demand at current levels.

HALVES: Franklin rolls were off and running this week and many of the later issues edged higher (see page three). BU clad rolls are also strong. Lengthy buy lists for MS-65 Walking halves have been appearing for several weeks. This week tne 1936-D and 1938-P moved up to a bid of $575 (each), while the low mintage 1938-D moved up $50 to a bid of $1500. The Walking half rolls are still quiet.

DOLLARS: BU dollar rolls posted almost across-the-board gains this week. Check the impressive gains in the charts on page five. Gem MS-65 singles, including prooflikes, are still being sought by numerous bidders. It should be noted that demand includes all dates and price ranges. The 1973-S Brown Ike dropped a dollar to $58 bid.

PROOF SETS and MINT SETS: Quite a bit of interest is being shown in the 1956 to 1964 "silver" proof sets. The 1959 was bid at a slightly higher $17.50. Mint set demand has been focused on the 1959 to 1964 issues with bids for the 1961 to 1963 sets moving to $20 this week.

COMMEMORATIVES: Aside from an occasional short buy or sell list, there's not a lot of teletype action for the silver issues. Activity at coin shows and auction prices have picked up considerably. Two gold issues have higher bids this week, as the Pan-Pac dollars and Sesqui $2½ both moved up to the $2000 level.

U.S. GOLD: (Prices ara for the most common date of each type.) Bullion ralated gold coins in this issue are figured on a basis of gold at $396.30 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

U.S. GOLD AND MORGAN DOLLARS SURGE HIGHER !

U.S. Gold Coins Wanted in All Grades

The Market in Depth

All U.S. gold coins are experiencing unprecedented demand. Even though gold bullion was down a few dollars this week, bids for most of the U.S. gold coins have moved higher. Most of the attention is centered around the larger denomination coins. There's much speculation about the cause of this "rush" to buy U.S. gold coins. Most analysts feel investors are concerned about both the proposed ban on Krugerrand imports and the new type of currency due to be issued in 1985. Supposedly, these investors are trading their Krugerrands and cash for U.S. gold coins. Another concern is the pending government reporting requirements for "bullion" transactions.

The $20 Saint Gaudens is the "main attraction" in this current buying surge. As CDN readers may know, the main source for $20 Saint Gaudens is European banks. Lately there have been rumors of the running out of coins and/or refusing to sell them. At this point there's a lot of speculation as to the end result of all of this "gold gobbling." One dealer recently remarked that, "there's at least $100 worth of air in Saint prices now," while another dealer conversely remarked, "The days of the 100 and 200 coin lots are gone."

The other "red hot" series is silver dollars. Dealers want to buy quantities of rolls and gem singles. The dollar roll industry is one of the higher volume areas of the coin market and the seemingly "bottomless pit" of demand has apparently finally dried up what was once a seemingly "bottomless pit" supply wise. Not to be outdone by the roll buyers, the dealers who specialize in gem dollars are now running daily buy tapes for nearly every issue. A bit of a bidding war over MS-65 dollars has developed, with the major competitors raising each other a couple of times a week. Gem prooflikes are also in demand, but actual transactions are very limited due to the rarity of these coins.

This Week's Market

CENTS: Lincoln rolls continue to drop with very little buyer interest as of yet. There aren't even any bargain hunting bidders. Check pages two and three for the new, lower bids. Gem, "full red" MS-65 Indian cents are now wanted at a higher bid of $450 and buyers are reportedly having a tough time locating any meaningful quantities.

NICKELS. BU Jefferson rolls also were sharply lower this week (see pages two and three). So far buyers don't seem interested, even at the new lower levels. Shield nickels moved up to $1250 in MS-65. Proof Shield nickels are now bid $1600 in MS-65 and $550 in MS-65. Gem proof Seated Liberty half dimes have moved up to a new bid or $2350.

DIMES: Unlike Lincoln and Jefferson rolls, all of the "silver" rolls (dimes, quarters and halves) are very solid at current levels. Full band Mercuries have started to see some renewed buyer interest. All of the type issues of this denomination are being actively sought after, with proof-65 Seated and Barber dimes moving up to a bid of $2150, while proof-63 examples are now bid $650.

QUARTERS: BU quarter rolls are still very active and early issues are wanted in grades MS-60 thru MS-65. The key date D-mints of 1934, 1935 and 1936 are now bid $390, $390 and $750 respectively, in MS-65 condition. The "with motto" Seated quarters are now bid $2350.

HALVES: There are now numerous buyers for gem MS-65 examples of all 1934 to 1947 Walking Liberty halves. Bids are starting to advance and higher prices will undoubtedly be in force in the upcoming Monthly Summary. The 1936-S half is now bid $800, while the 1937-D and 1937-S moved to $900 and $825 respectively. BU Walker rolls, on the other hand, are a little soft at present. BU Franklin rolls are still needed by several quantity buyers (check the higher bids on page three).

DOLLARS: Dollar prices soared again this week. Any pre-1921 dollar roll will now bring a minimum of $935. The 1921 Morgan roll moved to a higher bid of $710, while the 1922-P and 1923-P Peace dollar rolls are now bid $680 each. Highlights of the extensive (see page five) gains for MS-65 dollars include:

- 1878S - No longer considered a common date and now bid $240
- 1882CC - Nearly all of the Carson City issues are higher. This one is now bid $275
- 1883S - Nearly impossible to locate as bid moves to $2800
- 1888S - All of the later S-mints have been on the move lately. This toughie is now bid $900
- 1890P, 1891P, 1892P - These rare Philadelphia issues moved higher to bids of $650, $1250 and $1750 respectively
- 1894P and 1895S - Two major rarities now bid $6500 and $6000 respectively
- 1901P - One of the rarest Morgans, and buyers "upped the ante" this week to a bid of $14,000

PROOF SETS and MINT SETS: Both proof sets and mint sets seem very firm at current levels. For instance, the 1968-S and 1969-S proof issue are wanted in quantity at the current bid of $3.75. Interest is still focused on the 1956 to 1963 proof sets and 1959 to 1963 mint sets.

COMMEMORATIVES: Buy lists are starting to appear for silver commemoratives. Both the silver and gold issues are wanted in all grades. Both 1903 Louisiana gold dollars moved to a higher bid of $2000 in MS-65 condition.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $394.30 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63- but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets use prices for individual issues as listed in the Monthly Summary.

Lincoln And Jefferson Rolls Are Selling Below 1964 Levels

The Market in Depth

This week saw further declines in the BU Lincoln and Jefferson roll market. Twenty years ago these two series were the center of attention in the coin market. While BU dime, quarter, and half dollar rolls have done spectacularly well during the past two decades (along with almost every other area of the market), many BU Lincoln and Jefferson rolls are selling well below their 1964 price levels! There are some Lincoln and Jefferson rolls that have done well; for example, most of the 1934 to 1943 cent rolls and all except one (1943-D) of the (1942-45) Wartime nickel rolls. But let's take a look at some bids from twenty years ago and compare them with today's prices. To give you a little perspective, in 1964 BU rolls of 1941-P dimes were bid $24, rolls of 1941-P halves were $35, 1880-S dollars were $25 (for a twenty coin roll!!!) and 1941 proof sets were $65.

Why have Lincoln and Jefferson rolls performed so poorly? That's a difficult question to answer. One thing is certain, however, the available supply is now much smaller than it was twenty years ago, and if buyers ever did get interested in these coins prices could, obviously, rise in a very dramatic fashion. And speaking of buyer interest, it should be noted that there are active buyers for gem, "full red" MS-65 1934 to 1945 Lincoln singles, and there is a small, but very enthusiastic, group of gem, "full step" Jefferson nickel specialists. But as for now, nickel and penny roll buyers are few and far between.

This Week's Market

CENTS: Extensive losses were recorded by many BU Lincoln cent rolls (see pages two and three and The Market in Depth). Both the Braided Hair and Classic Head types of half cents are bid higher in MS-63 and MS-65 condition. Coronet Head large cents are now bid $2600 in MS-65 while the Braided Hair large cent bid is up to $2400. MS-65 Indian cents continue to climb as bid reached $475 this week. Braided Hair half cents were also higher in circulated grades.

NICKELS: Like the Lincolns, Jefferson rolls suffered major losses (also see The Market in Depth and pages two and three). It should be noted that there are quantity bidders for the Wartime nickel issues. Liberty nickels are now bid $275 in MS-63 and $800 in MS-65. Liberty nickels are also higher in Proof (PR-63 bid is now $450, PR-65 is $1200). Seated half dimes (legend obverse) are bid at a higher $1900 in MS-65, $675 in PR-63, and $2500 in PR-65.

DIMES: BU dime rolls are still very much in demand at current levels. A few of the later "silver" rolls edged higher, Proof-65 Mercury dimes are now bid $380. Early date proofs are also higher. See the enclosed Monthly Summary.

QUARTERS: BU quarter rolls are also very strong at current levels. Some of the MS-65 Washington singles are still on the move. The 1934-D and 1935-D are now bid $410 each. The key date 1932-S is now at $1250 and the very tough 1936-D moved up to a bid of $750. "With motto" Seated quarters are now bid $2450, while MS-65 Barber quarters are $2100. All types of MS-65 Standing quarters are bid at higher levels (see page six and the Monthly Summary).

HALVES: Extensive gains were posted by MS-65 examples of the 1934 to 1947 Walking half dollar issues (see the Monthly Summary), as the daily bidders raised their buy prices to even higher levels. Many of the later Franklin rolls are higher, but the 1946-P, D, S and 1947-P and D Walker rolls were lower. Proof-65 Barber halves are bid at a higher $3800. Proof Walking Liberties are also higher ($425 in PR-63 and $800 in PR-65).

DOLLARS: The MS-65 and MS-65 Prooflike dollar charts are covered with a rash of plus signs (see page five). Several more bidders have joined the daily "battle" to buy gem silver dollars. Dollar rolls have leveled off a bit, with just the 1878 thru 1882 S-mints moving higher this week. Several type issues are higher. Trade dollars are now $4000 in MS-65 and $5600 in PR-65. Morgan dollars moved to a higher bid of $4500 in PR-65.

PROOF SETS and MINT SETS: The 1961, 62 and 63 proof sets moved up two bits each to a bid of $13.25. All other proof sets seem to be trading actively within current levels. Mint sets are also quite active. The 1973 mint set was down slightly to a new bid of $14.50.

COMMEMORATIVES: One bidder is now seeking many of the tougher pre-1930 silver issues and several bid prices are higher this week (see page two). The gold issues are still in strong demand and actual transactions are very limited, even though several bids moved to even higher levels.

U.S. GDLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $388.20 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 -but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets use prices for individual issues as listed in the Monthly Summary.

GOLD MARKET SOFTENS

Gem Coins Still Very Active

The Market in Depth

This week saw a considerable shift of market direction for the bullion-related U.S. gold coins. The leader of this market is the $20 Saint Gaudens. MS-60 Saints peaked about a week ago with a bid of slightly more than $900. As this issue goes to press, $20 Saint Gaudens are bid $S48 in MS-60 with corresponding lower bids in grades VF thru AU (see below). The other major U.S. "bullion" coin, the $20 Liberty, is also down substantially in grades VF thru MS-60. The new higher prices for U.S. double eagles apparently brought out quite a few coins. Dealers attending the New York Invitational Coin Show last weekend reported numerous one hundred and two hundred coin lots of Saints were available. This is a sharp contrast to the market conditions of the past few weeks when "it was hard to get a quote for fifty coins."

The market for top quality (MS-65 or better) coins continues to move forward. The following dealer-to-dealer prices at the New York Invitational Show illustrate the tremendous demand for gem coins:

1863 ½ dime	MS-67	$ 5,750
1866 ½ dime	MS-67	$ 5,000
1859 dime	MS-67	$ 6,000
1890 dime	MS-65	$ 2,000
1887 Silver dollar	PR-65	$ 6,650
1903-O dollar	MS-67	$ 1,300
1878 five dollar	MS-65	$ 5,000
1908 five dollar	PR-65+	$22,000
1907 High Relief	MS-67+	$32,500
1893 Columbian	MS-67	$ 1,075
Elgin	MS-67	$ 475

This Week's Market

CENTS: BU Lincoln rolls were lower again this week (see pages two and three), though the new lower prices have finally stirred some limited buyer interest. Currently the 1951-P and 1955-S rolls have suddenly captured buyers' attentions. Gem copper type coins remain virtually unavailable at current levels. Bids for both the Classic and Braided Head half cents moved to $2800 in MS-65 condition. Coronet large cents are now bid $2750 and the Braided Head has moved to $2500.

NICKELS: BU Jefferson rolls also slipped further this week (see pages two and three). It should be noted that there is considerable interest in the Wartime issues at or near current bid levels. One bidder is offering $2500 for sharply struck Warnickel roll sets. Liberty Head nickels are now bid $825 in MS-65 condition. Proof-65 Seated half dimes are now bid $2600 and buyers want quantities.

DIMES: Even though silver bullion has slipped a little, the later "silver" Roosevelt rolls edged higher this week and buyers are in the market for large quantities. Gem MS-65 Seated dimes are now bid $1600, but are often bringing more than that at auctions and coin shows. Both Barber and Seated dimes are now bid $2250 in proof-65 condition.

QUARTERS: Late date "silver" quarters rolls are also in demand and bids have moved up a notch (see page three). MS-65 "no motto" Seated quarters are now bid $3000, while the "with motto" bid has moved to $2600. Gem MS-65 Barber quarters are wanted in large quantities at a new bid of $2200.

HALVES: The bid for common date (1941-P thru 1945-P) Walking Liberty rolls slipped $50 to $1450. It should be noted that lengthy buy lists for MS-65 1934 to 1947 Walkers are still appearing on a daily basis. Several of the Franklin rolls have moved to higher levels (see page three) and this area of the market remains very active. The "no motto" Seated half variety is bid at a higher $3700, while the "with motto" variety is now wanted at $3500. Gem uncirculated Barber halves are now bid $3400.

DOLLARS: Silver dollars are still one of the brightest spots in the market. The BU dollar roll market remains quite strong. Gem MS-65 Morgan and Peace dollars remain the subject of daily buy tapes. Buyers are reporting considerable trouble in locating more than a fraction of the coins that they need. Gem proof-65 Trade dollars moved up $200 to a bid of $5800, though few, if any, have been located at that price.

PROOF SETS and MINT SETS: Several of the proof sets have moved to higher levels (see page six) and there is considerable interest for all the 1956 to 1976 issues. The 1959 to 1964 "silver" mint sets were also higher.

COMMEMORATIVES: Silver commemoratives are still very active at coin shows and auctions, though teletype activity is still minimal. There were a few higher bids this week (see page two). There are quantity buyers for gem MS-65 examples of all of the gold commemorative issues. The 1916 McKinley is now bid $2450 in MS-65 condition and the 1917 McKinley has moved to $2700 in MS-65.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $379.30 per ounce.

MS-60 coins are "avetage UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) Will exhibit the same characteristics at the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOF LIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets use prices for individual issues as listed in the Monthly Summary

TYPE COINS SOAR!

Bullion-Related Areas Soften

The Market in Depth

Gem Mint State-65 and Proof-65 type coins have moved to higher ground in a wave of buyer activity. Reports from coin shows indicate all type coins in grades 63+ to 67 are selling very well. One major development in this new "buying spurt" is the fact that buyers are actively seeking the "minor" type varieties (no stars, arrows, etc.), as well as the major type issues. In discussing his concentration on major issues, one buyer recently remarked, "I need to buy a ton of coins. Therefore, it's not the most prudent use of my time to search for stars obverse dimes, for example, as I will probably only see one or two gem examples a year. It's much more productive for me to try to buy the more common legend obverse type." While this thinking is still very much intact, buyers are now also trying to nail down gem examples of the rarer types.

The "quantity buyer" thinking deserves more discussion. These guys don't just want to buy one or two gem examples, they want to buy ten or twenty or one hundred coins or more! This large volume buying has always been evident in the dollar roll and U.S. gold markets, but for the gem coin market this phenomenon is relatively new. For instance, one buyer runs daily teletype messages trying to buy "up to one thousand gem Walking halves, up to one thousand gem S-mint dollars, up to one hundred gem proof Mercury dimes and up to one hundred gem $20 Saint Gaudens." Another buyer is constantly asserting his willingness to buy rolls and even bags of super quality Walking halves and Morgan dollars. Every day major buyers offer to buy large quantities of MS-65 examples of every 1934 to 1947 Walking half. And on and on it goes. The depth of current buyer demand is simply staggering.

Bullion-related issues softened a little more this week. The "bellwether" issue, MS-60 $20 Saint Gaudens have now fallen from a peak bid of slightly over $900 (approximately two weeks ago) to a current hid of $795. It's hard to say exactly where Saints will find major support, but with MS-60 $20 Liberties now bid at $740, Saint bids should probably be nearing a bottom. Another area that tends to follow the bullion markets fairly closely is BU dollar rolls. Dollar rolls have also softened a little, but they are trading fairly activcly at current bid/ask levels.

This Week's Market

CENTS: BU Lincoln rolls suffered some further adjustments, hut there aren't nearly as many minus signs as there were in the past few wceks. Coronet large cents are bid $2900 in MS-65 and Braided Hair large cents are now $2600. Flying Eagle cents and all Indian cent varieties have moved higher in gem MS-65 condition. Bid for MS-65 Two cent pieces moved to $1500.

NICKELS: Jefferson rolls moved a little lower, but like the Lincolns, minus signs were relatively limited. Buyer interest remains focused on the 1942-45 silver wartime rolls. Three cent nickels are now bid $550 in proof-63 and $1500 in proof-65. But half dimes were higher in MS-65 (bid $4000) and four of the Seated half dime varieties also moved higher (see page six).

DIMES: Dime roll buyers are still pursuing the later BU "silver" rolls. There is some increased buyer activity for BU Mercury rolls. Both the large size and small size Bust dime have registered higher bids in MS-65 condition ($8500 and $6500 respectively).

QUARTERS: Again, roll buyers want the later "inexpensive silver" issues. The early Washingtons are still wanted in all grades and a few MS-65 bids have been raised (see page two). Small size Bust quarter bid (MS-65) moved up a notch to $8500 and all six Seated quarter varieties are higher in gem condition.

HALVES: Further gains have been registered for several of the MS-65 1934-1940 Walker issues (see page two). Late date Franklin rolls were also up, and buyer interest in this area appears to be very strong. Many of the Seated half dollar varieties are higher in MS-65 (see page six) and MS-65 Barber halves are now bid at $3500.

DOLLARS: This week saw another round of scattered gains for MS-65 and MS-65 prooflike silver dollars (see page five). It's important to note that buyers are interested in large quantities (see The Market In Depth) and bidder interest covers the entire series, including the more expensive rare dates. Gem MS-65 Trade dollars are now bid $4250, while gem proof Morgans are bid at a higher $4700. Ike dollars have been somewhat quiet recently.

PROOF SETS and MINT SETS: The 1956 to 64 "silver" proof sets are still grabbing the lion's share of bidder attention. There are now numerous large quantity buyers for the popular 1961, 1962 and 1963 issues. Mint sets are also fairly active and buycr attention remains focused on the 1959 to 1964 sets.

COMMEMORATIVES: Silver commemoratives are reportedly selling very well at recent coin shows. A few MS-65 bids have been increased (see page two). The low mintage 1933-D Orcgon is now wanted in all grades. Gold commemoratives are now wanted by several major buyers and most of the MS-65 bids are at higher levels.

U.S. GDLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $382.30 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

GOLD COMMEMS AND MS-65 WALKERS SCORE SUBSTANTIAL GAINS

Bidders Want Quantities of Walkers, Dollar Rolls Slip

The Market in Depth

The gold commemorative set is now receiving considerable attention from numerous bidders. The eleven coin set (nine gold dollars and two $2½ pieces) has been very popular with investors for at least the last ten years. The eleven issues usually move in tandem. That is to say it's pretty usual for just one or two issues to be going either up or down. Usually the majority of the eleven coins will move together. Numerous bidders now want all eleven issues in all grades XF/AU thru MS-65. There are two major buyers that want large quantities of all eleven issues in gem MS-65 condition. As an interesting side note, for as long as the CDN has listed gold commem prices, the Grant with star and the Grant no star have traded at basically the same price. This week bidders upped the ante on the Grant with star. One of the major buyers commented that he sees five or ten Grant no stars for every with star he sees.

The BU silver dollar roll market suffered some price adjustments this week. After several months of nearly nonstop price increases, this area appears to have temporarily topped. Here's a recap of the price movement since the first of the year:

	1-6-84 BID	4-20-84 BID	INCREASE
Common Morgans	$765	$900	+17.6%
S-Mints	$1025-$1200	$1250-$1350	+16.9%
1921 Morgan	$585	$725	+23.9%
1922 and 1923 Peace	$565	$700	+23.9%

After such a sharp increase, in such a short period of time, a "resting period" is understandable. And this is also one area that is usually influenced strongly by the ups and downs of the silver bullion market.

This Week's Market

CENTS: BU Lincoln rolls have apparently settled down a little after several weeks of widespread losses. There isn't a lot of action on the bidding side, but there's not a lot of selling either. Flying Eagle cents are now bid $2350 in MS-65 and $550 in MS-63, while the 1859 Indian has moved to $2250 in MS-65.

NICKELS: BU nickel rolls have also apparently firmed up after many weeks of price drops. Trading is very light. There is one bidder interested in buying "one thousand gem MS-65" 1938-D Buffalos at $36 each. The rare Type II Three cent silver is now bid $3750 in MS-65. Liberty nickels (with "cents") moved up $25 to $850 in MS-65 and up $50 to $1250 in proof-65.

DIMES: Bidding for both BU Roosevelt and Mercury rolls is on the increase, though bidders are content to restrict their buying efforts to current bid/ask levels. All MS-65 and proof-65 dime types are wanted in quantity.

QUARTERS: The scarce early date Washington singles are still on the move in MS-65 condition. The 1932-P is bid $200, the 1936-S moved to $250 and the 1935-S is now $375. The 1938-P, 1938-S, 1939-S and 1940-D are now bid $200 each. The very tough "no motto" Seated quarter is now bid $3500 in MS-65 condition, while the rare 1873-74 Arrows variety is bid at a higher $4250.

HALVES: Bidders have substantially increased their buy prices for all 1934 to 1947 MS-65 Walking Liberty half dollars. Check out the gains for the 1934 to 1939 issues on page two!! Franklin rolls are still high on everybody's want lists and the minimum bid is now $150 per roll. Both the "no motto" and "with motto" Seated halves are bid higher in proof-65 ($3750 and $3500 respectively).

DOLLARS: BU dollar rolls slipped a little this week (see page five and The Market In Depth). Several MS-65 dollar bids have moved to higher ground and there are numerous extensive buy lists being run on a daily basis. The Ike market is somewhat slow, though most issues are very saleable at or near current levels.

PROOF SETS and MINT SETS: Though there's not a lot of price movement, the proof and mint set markets are certainly receiving a lot of attention on the teletype circuit. The "hot" 1961, 1962 and 1963 sets are now wanted in "huge" quantities at the new bid of $14.

COMMEMORATIVES: Things are relatively quiet for the silver commemorative series, though gems are reportedly selling very well. On the other hand, gold commems are definitely on the move! Check out the higher bids for MS-65 gold commems on page two.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $379.60 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

SILVER PROOF SETS AND GEM WALKERS ARE ON THE MOVE

MS-65 1934 To 1947 Walkers Have All Moved Up This Year

The Market in Depth

A good deal of teletype time is now being devoted to attempts to try to buy large quantities of the 1956 to 1964 "silver" proof sets. Buyers want huge quantities, particularly of the 1961, 1962 and 1963 sets. It should be noted that there are literally dozens of buyers! This area is definitely hot.

Walking Liberty half dollar buyers have also been out in force recently. For at least the past thirty days several major quantity buyers have been running daily buy tapes for all MS-65 1934 to 1947 halves. The chart below shows the substantial across-the-board move made by this series:

This Week's Market

CENTS: Things are a little more stable in the Lincoln roll market this week. There were no minuses, but it must be noted that buyer interest is minimal. Half cents and Large cents are up again in gem MS-65 condition. Indians are also up to a new MS-65 bid of $525. Gem MS-65 Two cents are now wanted at $1550.

NICKELS: Nickel rolls also stabilized this week, but buyers are virtually "asleep." Shield nickels are now bid $1350 in MS-65, while the no "cents" variety Liberty nickel is now a higher $425. Proof-65 Shields also moved up with bid now at $1650!

DIMES: Dime rolls were relatively quiet, though there are still anxious buyers for the later silver rolls. The ultra tough Bust dime (small size) is now bid $6750 in MS-65. The "not-so-tough" Barber dime edged up $50 to a new bid of $1100.

QUARTERS: The later silver rolls are still needed by numerous quantity buyers, as are the early (1932-40) Washingtons in MS-65 condition. Gem unc Seated quarters are now very hard to locate with any meaningful frequency and the new bids on page six are evidence of this fact. The most common variety (with motto) is now bid $3000. Barber quarters are bid $2350, reflecting the general overall strength of the gem type coin market.

HALVES: Late date BU Franklin rolls are almost as popular with bidders as the 1956 to 1964 proof set run. Check the new bids on page three. Also note the new bids for MS-65 Walking halves (see the enclosed Monthly Summary) Barber halves are now bid $4000 in proof-65 and $1200 in proof-63.

DOLLARS: Gem MS-65 and MS-65 prooflike dollars are still surging forward. Check the latest gains on page five! The dollar roll market lost a little steam in the past few weeks, but there are bidders at current levels.

PROOF SETS and MINT SETS: As mentioned in The Market In Depth, late date silver proof sets are red hot! The 1961, 1962 and 1963 sets are now bid $14.50 each. The S-less sets are also in demand. The 1983 S-less set is bid at a higher $625.

COMMEMS: Silver issues still are seeing much teletype buying action. In contrast, the gold issues are the subject of several bidders' concentrated buying efforts. The eleven piece gold set is now bid $32,500!

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $386.40 per ounce

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (BARE, ABOUT UNCIRCULATED) Barely uncirculated—showing an even dense rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck; may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOF-LIKE (CHOICE UNCIRCULATED PROOF-LIKE) Will exhibit the same characteristics as the MS-63—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

MILLER SILVER DOLLAR SET SELLS FOR OVER A MILLION!!

The Market in Depth

For sixteen years silver dollar expert Wayne Miller worked to assemble the finest possible set of Morgan and Peace dollars. Miller, most famous as the author of two milestone books on silver dollars, succeeded in building what many specialists do indeed believe is the finest set of silver dollars ever assembled. On April 27, 1984, at the Central States Coin Show Wayne Miller's silver dollar set was sold to Newport Beach, California coin dealer David Hall for a price in excess of one million dollars!! When reached for comment Hall stated, "Besides being one of the top silver dollar experts, Wayne Miller is also one of the field's greatest scholars and authors. Wayne understands silver dollars like no one else can and his silver dollar set is truly a work of art. When one considers the four or five really special things in the numismatic world, the things that pop into your mind are the Elisaberg coins, the Wilkinson gold patterns and Wayne Miller's silver dollar set. The set was purchased for a client who wishes to remain anonymous and all I'm at liberty to say about the price was that it was over a million dollars. My client is a very knowledgeable coin collector and he is very thrilled with the addition to his collection."

The Wayne Miller silver dollar set included many of the "finest known" specimens including:

1878-S. A perfect, extremely deep mirror prooflike, which many specialists feel is possibly the finest example of what a prooflike dollar can look like. Though "just a common date," Miller stated he had turned down $10,000 for the coin several times!

1879-O. Branch Mint Proof! Generally considered to be the finest known Branch Mint Proof Morgan dollar.

1882-CC. Branch Mint Proof! The only known specimen!

1886-O. Another perfect, extremely deep mirror prooflike. Miller had turned down offers as high as $60,000 for this coin.

1892-O. One of the few known deep prooflikes and the only one which isn't flatly struck. This coin has also received several mid-five figure offers in the past few years.

1893-CC. Branch Mint Proof! In 1973 this coin became the first Morgan dollar to sell for more than $10,000.

1894-P. The only known gem prooflike.

1895-O. A superb semi-prooflike MS-67/70. Hall stated, "This is the finest known by at least four points and was 'figured' at $100,000."

The set also included all of the proofs, including the 7tf round Breast, 1921-S Branch Mint, 1921 Peace satin finish, and 1922 Peace satin finish. Needless to say, the price realized by the Wayne Miller silver dollar set was an all-time record.

Other areas of the market were also strong at the Central Statcs Show. The following auction results show the continuing strength of gem material:

This Week's Market

CENTS: Little activity to report in the Lincoln roll market. The 1937-P roll edged down to a bid of $30. The tough Copper-nickel type (1860-64) Indian cent is now bid $1000 in MS-65.

NICKELS: There's not much going on in the nickel roll market. The only change was the 1941-S roll, which moved down to a bid of $60. MS-65 no "cents" Liberty nickels are now bid $450 in MS-65. Gem proof-65 Three cent nickels are up $50 to a bid of $1550.

DIMES: Silver dime rolls are still selling actively at current levels. Proof-65 Mercury dimes are wanted in quantities at $400.

QUARTERS: Quarter rolls are relatively quiet. Gem early singles are still in demand. In MS-65, the 1936-S is now bid at a higher $275, the 1937-D moved to $125 and the 1939-D hit $85. The rare 1854-55 with Arrows type Seated quarter is bid $5250 in MS-65 condition. Check page six for the gains in gem proof quarter types.

HALVES: BU Franklin rolls still top many want lists and there are daily buy tapes for all MS-65 1934-1947 Walking Liberty halves. The very elusive MS-65 Bust half dollar is wanted by several bidders, with bid moving to $4750. Proof-65 "with motto" Seated halves are now bid $3750, while the "no motto" variety is $4000.

DOLLARS: The strong buying attempts for MS-65 dollars by several major bidders continues (see page five). However, lower bullion prices have softened the demand for BU dollar rolls and bid prices have adjusted accordingly (see page five).

PROOF SETS and MINT SETS: The late date "silver" proof and mint sets continue to lead this area of the market. The 1961, 62 and 63 proof sets are wanted in large quantities at the new bid of $15. The S-less sets are also very strong.

COMMEMORATIVES: The Central States Show saw quite a bit of buying action for silver commemoratives and several large lots reportedly change hands at considerably more than current bid levels. This new buyer activity has not yet made its presence felt on the teletype circuits. Two major buyers are still eager bidders for all gem gold commcms (see page two).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $376.75 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (EXCHANGE UNCIRCULATED) Any coin that is sharply struck, showing only slight evidence of wear. However, all of the original mint luster must be present. Minor contact marks are necessary. Coins may be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 -but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

BULLION DRIFTS LOWER BUT GEM COINS STILL STRONG

Buyers Are Cautious But Still Buying

The Market in Depth

In the face of sharply lower bullion prices, rare coin buyers have adopted a somewhat cautious stance. It's no secret that bullion prices are one of the major influences on the rare coin market. Directly affected by the bullion drop are most $5 thru $20 U.S. gold coins in grades VF thru MS-60 (see below). Interestingly, the late date BU silver rolls (1956 thru 1964) are holding up very well, especially the Franklin halves. Silver dollar rolls, on the other hand, are fairly soft.

The market for gem quality coins has remained very strong. Buy lists are not quite as frequent, but buy prices certainly haven't been lowered. Most dealers we've spoken to indicate that there's still a shortage of quality material, and retail sales are still quite good. Consequently, there's still strong demand for gem silver dollars, type coins, gold commems, etc.

This Week's Market

CENTS: Action in the BU Lincoln roll market is still extremely limited. It should be noted that gem examples of the 1909 to 1945 issues are actively trading. Gem BU and gem proof type coins are also still in demand.

NICKELS: Jefferson and Buffalo rolls are still in the doldrums, though there is one bidder looking for MS-65 Buffalos. The 1943/2 nickel is lower in grades VF through MS-60. Proof-65 Three cent silvers are bid at a higher $2600. The underrated MS-65 Shield nickel has moved up to a higher bid of $1400.

DIMES: Late date silver dime rolls are still popping. The 1954-S roll is now bid $70. The "Bellwether" 1955-D and S rolls are bid at a higher $68 and $58, respectively. Proof-65 Mercs edged a little lower to a bid of $380.

QUARTERS: Quarter rolls are still trading actively at current levels. The earlier Washingtons are wanted in MS-65 condition. The ultra tough "no motto" Seated quarter jumped up $250 to a bid of $4000.

HALVES: Franklin half dollar rolls are commanding a great deal of teletype attention. The 1954-S roll is now bid $300. The "key" 1955 roll moved to a bid of $260, with some even higher offers. The 1956 roll is now at a bid of $275 and the most common date rolls have moved to $155. Walking Liberty half dollars are still very active in MS-65 condition.

DOLLARS: Things have settled down a little bit for MS-65 dollars. There are still major quantity buyers in the market, but bids remain at current levels. The 1882-S is up a notch to $235, while the 1885-S is now bid at a higher $1150. The dollar roll market is quite a bit softer, though bids haven't dropped yet. .

PROOF SETS and MINT SETS: Late date silver proof sets have also settled down a bit. The three S-less sets (1970, 1971 and 1983) are quite active, with bid on the 1983 now at $650. Mint sets are relatively quiet.

COMMEMORATIVES: Silver commemoratives are still trading at current levels. There are two major buyers looking to purchase quantities of all eleven gold commemorative issues in MS-65 condition. The rare, "key issue" Pan-Pac $2½ is now bid $5500. The Grant and Grant with star have moved to higher bids of $2900 and $3100, respectively.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $371.90 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated - showing no evidence rubbing or friction. However no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 - but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary

MS-65 SILVER DOLLARS SCORE EXTENSIVE GAINS!

Prooflike Morgans Enjoy Continued Demand

The Market in Depth

Prooflike dollars continue to attract interest from collectors, investors and dealers. Every week several major teletype dealers offer to pay "at least bid" for all prooflike Morgans. At coin shows, it seems like there's at least one "wonder price" per show paid for some extraordinary prooflike dollar. And at auctions, exceptional coins often bring double and even triple current bid levels. What is so special about this somewhat esoteric area of the coin market that drives buyers "wild?" Before we answer that question, let's define exactly what type of coin we're talking about. A prooflike dollar is a silver dollar that has highly reflective, mirror-like fields. Instead of frosty white lustrous surfaces, the coin's surfaces have the same appearance as a brilliant proof. Prooflike dollars are first strikes from freshly polished dies. They are, therefore, much rarer than non-prooflikes. While no exact population count is possible, most experts would agree that less than 1% of the existing population of uncirculated silver dollars are prooflikes. In other words, prooflikes are over a hundred times as rare as non-prooflikes.

Top quality (MS-65) dollars are much more difficult to obtain than average quality (MS-60 and MS-63) coins. So, when a coin is both MS-65 and prooflike it is a truly rare coin.

Besides being rare, prooflike dollars can be very aesthetically pleasing. A Morgan dollar with deep mirror, prooflike surfaces and white cameo devices is a really beautiful coin. This beautiful and rare coin also happens to come from the most popular U.S. coin series. In short, prooflike dollars have tremendous demand from coin buyers.

The CDN lists bid ranges (as opposed to bid/ask prices) for prooflike dollars, because these rare coins are infrequently traded and subtle differences in contrast, color, mirror depth, etc. make establishing exact price levels difficult. Interestingly, bid ranges for prooflike dollars average about 100% over non-prooflike MS-65 prices (there are, of course, some rarities with much larger premiums). After gradually expanding during the 1970's, the premium has remained relatively stable for the past few years. It will be interesting to follow the premium in the next few years, but one thing remains certain; buyers will continue to pursue prooflike Morgan dollars.

This Week's Market

CENTS: Activity has picked up somewhat for BU Lincoln rolls, with scattered buy offers in the bid to 10% under bid range being noted. MS-65 Two cent pieces are now bid $1600. Buyers, of course, are only interested in the "Full Red" strictly graded variety.

NICKELS: Three cent nickels have moved up to a bid of $1250 in MS-65 and $1600 in proof-65. Both the type one and type three Three-cent silvers are bid at a higher $2500 in MS-65 condition.

DIMES: Bidders were noted this week for the "less than $100" Roosevelt rolls. Mercury rolls are receiving less attention.

QUARTERS: Quarter rolls were relatively quiet this week. MS-65 early date singles are still in demand, along with all MS-65 and proof-65 type issues.

HALVES: The "inexpensive" Franklin rolls still lead this area of the market though lower silver bullion prices have quieted bidders down a bit. MS-65 Walking Liberty halves are wanted by several major buyers.

DOLLARS: Check out the rash of plus signs in the MS-65 dollar charts on page five! The entire series now receives daily buying attempts and the major buyers report considerable difficulty in locating enough coins to "fill existing orders." It must be noted that buyers are only interested in sharply struck, minimally abraided, i.e. strict MS-65 coins. It's also worthy of note that buying efforts include all dates and price ranges. BU dollar rolls appear to have stiffened up a bit.

PROOF SETS and MINT SETS: Many of the common later date issues have drifted lower this week (see page five). The "silver sets" (1956-1964) are relatively stable. Bidding for early proof sets (1936 to 1942) is now more focused on the individual coins rather than the entire sets.

COMMEMORATIVES: Silver commemoratives are relatively quiet. The gold commem series continues to attract the attention of several major bidders, particularly MS-65 examples.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $373.60 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (NOT CIRCULATED) Struck uncirculated, showing no evidence rubbing or friction. However no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereceristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They renge from very scerce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart ere for "typical" coins. These usually average MS-63 -but may also include MS-65 exemples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

U.S. TWENTIES STILL LOWER!

MS-65 Dollars Show Further Gains

The Market in Depth

The U.S. gold market continued its plunge last week. U.S. $20 gold pieces were significantly lower in all grades. MS-60 $20 Saint Gaudens have now fallen nearly $250 from the March 30, 1980, high bid of $900 to this week's bid of $662. It should be noted that during that last week in March dealer-to-dealer transactions were recorded as high as $925 to $950. MS-60 $20 Liberties have fallen from a high bid of $765 to this week's $601 bid. Lower grade twenties have suffered a similar fate. $10 Indians and Liberties have also dropped substantially in grades VF thru AU. The premium on MS-60 Saints is now 80.5% and most bullion dealers have commented that it looks like Saints are nearing a bottom.

This week at the Georgia Numismatic Association Show in Atlanta, Mid-American Rare Coin Auctions offered an exceptional grouping of coins. Price results indicate a continuing strength in the market for the finest quality numismatic material. Highlights include:

Columbian 50¢	MS-67	$ 577.50
Huguenot 50¢	MS-65	660.00
1846 $1	PR-67	14,300.00
1880-S $1	MS-65+ PL	605.00
1882 Morgan $1	PR-67	5,775.00
1883-O $1	MS-67	632.50
1895 $1	PR-67	47,300.00
1895-S $1	MS-65 PL	14,300.00
1902-O $1	MS-67	726.00
1852 Gold $1	MS-67	9,900.00
1898-S $10	MS-65	6,050.00
1910-D $10	MS-65	5,225,00

This Week's Market

CENTS: While activity in the BU Lincoln roll market can hardly be called brisk, there were some new bidders. Buyers want bags of later dates and a few scattered early date and a few scattered early date rolls. The 1944-P roll is now bid $8, while the 1945-P moved to $7.75. Check the enclosed Monthly Summary for bids on MS-65 1934 to 1945 singles.

NICKELS: The BU Jefferson roll market is still very dull. Nickel type coins, on the other hand, are very active. As usual, bidders want gem MS-65 and proof-65 coins, with proof Shield, Liberty and Three cent nickels getting the most attention.

DIMES: Dime rolls are somewhat slow though there are quite a few buyers for the inexpensive silver rolls. Seated and Barber dimes are wanted in MS-65 and proof-65 condition.

QUARTERS: All of the inexpensive silver rolls are very saleable at current levels. The early Washington singles continue to head want lists in MS-63 and MS-65 condition. Be sure and check the enclosed Monthly Summary for prices for MS-65 1934 to 1945 singles that aren't listed in the weekly.

HALVES: BU Franklin rolls are the most active area of the BU roll market. The 1953-S roll is now bid at a higher $480. The 1954-S is now bid $310, the 1955-P is bid $270 and the 1956-P is bid $285. Type coins are still wanted in gem condition.

DOLLARS: MS-65 dollars continue to be one of the strongest areas of the coin market. All dates in both the Morgan and Peace dollar series are wanted in quantity. Check page five for the latest gains. The BU dollar roll market is giving mixed signals at current levels, while Ike dollars are definitely soft.

MINT SETS and PROOF SETS: Late date proof sets were down slightly this week. Actually, the proof set and mint set market is very active, with lots of buyers in the bid to 10% off bid range. The S-less sets are still quite active, with the 1970 set moving to a higher bid of $635.

COMMEMORATIVES: Many of the silver issues moved higher in XF/AU condition as several bidders raised their buy prices. MS-63 and MS-65 silver commemoratives are trading very actively at current levels. Gold commemoratives are still wanted in all grades.

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $379.10 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

MS-65 TYPE AND DOLLARS STILL VERY STRONG

Bullion Rebounds — U.S. Twenties Higher

The Market in Depth

After a steep price plunge, it appears as if the market for average uncirculated $20 gold pieces has indeed bottomed. MS-60 Saints, which peaked at $925 about a month ago, were bid at a higher $675. MS-60 $20 Libs have moved up to $615 bid. Numerous bidders are seeking significant quantities at these levels.

The market for gem MS-65 Morgan and Peace dollars (including prooflike Morgans) is still very strong. Once again this week bidders upped the ante for numerous dates. Several major buyers have reported that their dollar orders are backlogged and they simply cannot find the coins they need. This year has been a great one for the MS-65 dollar market. Let's look at a few selected dates and see how well they've done since the first of the year:

	1-6-84 BID	6-1-84 BID	INCREASE
1878-8tf	$ 410	$ 550	+34%
1878-7tf	360	500	+39%
1878-CC	330	450	+36%
1878-S	195	295	+51%
1879-S	155	195	+26%
1880-S	150	190	+27%
1881-CC	435	550	+26%
1881-S	145	190	+31%
1882-CC	210	350	+67%
1883-CC	185	325	+76%
1884-CC	185	325	+76%
1892-CC	925	1250	+34%
1894-P	5250	7500	+43%
1895-S	4850	6500	+34%
1896-S	2400	3500	+46%
1921 Morgan	225	300	+33%
1926-S	550	750	+36%

Most of the other issues in the series have shown gains in the 10% to 25% range. And this is just in the first five months of the year! Also, note that the big gainers listed above include dollars in all price ranges.

This Week's Market

CENTS: BU Lincoln roll activity is still quite light. Gem, full red MS-65 half cents (both Classic and Braided types) moved up $250 to a new bid of $3250. Gem half cents are one of the most elusive major type issues at current price levels.

NICKELS: The BU Jefferson roll market is pretty slow. The only activity is in the wartime rolls and the 1950-D roll. MS-65 Liberty nickels are bid at a higher $875, while gem proofs moved up to $1300. Proof-65 Three cent silvers are now bid at a higher $2750, but proof-65 Three cent nickels slipped $50 to a lower bid of $1550.

DIMES: Dime rolls were unchanged this week. Proof-65 Seated and Barber dimes were both up $100 to a bid of $2400.

QUARTERS: The early date Washington quarters are still a hot item. All 1932 to 1940 issues are wanted in grades MS-60 to MS-65. The 1942-S and 1943-S are also in demand, with bids rising to $100 and $70, respectively. Type One Standing Liberty quarters are now bid $1600 in MS-65. Full Head type twos have also moved up to the $1600 bid level.

HALVES: Franklin rolls are still in demand, but bidding was less intense this week. Gem proof-65 Barber halves are few and far between, even though bid was up another $200 and now stands at $4200.

DOLLARS: Quite a few of the less expensive dollars are bid higher in MS-65. The 1880-S and 1881-S have moved to $190, as the time is rapidly approaching when all silver dollars will bid at least $200 in gem condition. The 1882-CC, 1883-CC and 1884-CC are still doing great (see The Market In Depth), as bid moved to $350, $325 and $325, respectively. Common and S-mint rolls have dropped a little (see page five).

PROOF SETS and MINT SETS: The 1950 thru 1953 proof sets are still hot, as quantity buyers raised their bids once again. The 1983 S-less set is up $10 to a bid of $660. There was one dealer bidding $15,000 for the ultra rare 1975 S-less set!

COMMEMORATIVES: Silver commemoratives are definitely starting to stir, though the new activity has yet to be reflected by higher bid levels. Most of the silver issues are wanted in all grades from XF/AU to MS-67! There are still major quantity buyers for all gem gold commems.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $389.70 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum
Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

• Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available)bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Barely uncirculated—showing no evidence rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-66 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

GOLD AND SILVER BULLION CONTINUE UPSWING

Long Beach Show Encouraging for Most Dealers

The Market in Depth

Gold and silver bullion has been advancing for the past four weeks. With this comes encouragement and hope for the (usually quiet) summer months. Attendance appeared quite substantial at the Long Beach Coin Show this past weekend. Dealers were generally active with varied want lists and on the other side of the coin, sales were quite brisk.

Many areas of the market are very active. Leading the way has to be original rolls of Roosevelt dimes, and Franklin halves. (Check all the plus signs on page three.) A last minute update shows wartime nickel rolls advancing rapidly with many pursuant buyers.

A few large lots of early proof sets (1936-42) broke recently with buyers maintaining current bids. It is still possible to break up these sets and sell the individual Walking Liberty half, Mercury dime, and Buffalo nickel or Wartime nickel and make a handsome profit if the coins are of gem MS-65 quality. The current bids on these coins remained the same but seemed to soften by the end of the Long Beach Show.

The "Blue Ribbon" probably has to go to a gem BU MS-65+ Type II one dollar gold piece. It changed hands dealer to dealer at an astounding $28,000. Current "grey-sheet" bid is only $13,500 in MS-65.

There are a number of dealers still looking for MS-65 Morgans in the $200.00 range. This past week the 1879-S, 80-S, and 81-S all climbed to the $200.00 level. Supplies at this time are still insufficient to satisfy demand.

There are many buyers of MS-65 commemoratives at current levels. There were as many as four dealers bidding on a complete set of MS-65 commemoratives at the show. The set finally sold at over $57,000. Other specific prices were noted. An Elgin with amazing rainbow colors sold for $550.00. A fully struck Maine sold for $625.00. Three Sesquicentennials with original patina sold for $420.00 each. And one California Jubilee with brilliant luster and a superb strike sold for over $500.00. Often left for dead, commemoratives in MS-65 appear to now have a following that should keep them a highly tradeable investment in the future.

This Week's Market

CENTS: Numerous sell lists have been monitored on BU Lincoln rolls. There are relatively no buy lists with the exception of the very strong 1944-P and 1945-P rolls. Bid has dramatically increased to $10.00 per roll. The 1983-P Lincoln cent with the reverse double die has been offered for sale: XF/AU - $130.00 per coin, gem BU - $200.00 per coin, and one roll of MS-60 and better has been offered at $6500.00. There have been scattered buys at $115.00 - $175.00 per coin.

NICKELS: The BU Jefferson roll market is very weak, to say the least. There are numerous 'minus signs' this week. (Check pages two and three). As in most cases, there are exceptions: The 1950-D roll is now bid at $225.00, and a mjaority of the wartime nickel rolls have increased.

DIMES: The majority of Roosevelt dime rolls from 1946 to 1964 are very strong and wanted by many dealers. An unusual situation occurred this week, as rolls were very strong, while single sets went down. Latest price update on 1982 no 'P' dimes was one transaction. A gem BU sold at $150.00.

QUARTERS: BU Washington quarter rolls are still steady at current levels although some price adjusting is occurring on some rolls. The 1932 to 1940 singles are still being actively sought in MS-63 to MS-65.

HALVES: This area of the market shows the most activity. Plus signs outnumber minus signs four to one in Franklins. With all the activity, Franklin sets did slip to a lower $825.00. There are still many active huyers of Walking Liberty halves. They either want nice original rolls or MS-65 singles. There was only one offer to sell 1982-P "no initial" halves. They were offered at $60.00 per roll.

DOLLARS: There are numerous buyers at current levels for MS-65 coins. Original rolls are still being sought with emphasis on original. Ike dollars slid to lower levels under absolutely no buying pressure at this time.

PROOF SETS and MINT SETS: There is one buyer still looking for large quantities of 1950 thru 1953 proof sets at current levels. But the sets must be nice. Proof sets from 1954 to date are under selling pressure. There is increased activity on "no S" proof sets at current levels, with no price changes at this time. The 1984 proof set has arrived with wide price ranges of: Bids - $12.00, Asks - $19.00. The 1980 and 1981 mint sets are wanted in large quantities at higher levels.

COMMEMORATIVES: Gem quality commemoratives are still selling strong at current levels, and more seem to be required. Check page two for various changes on XF/AU commemoratives. The 1982 Washington commemorative has been monitored at: BU $7.50 each and Proof $8.50 each.

TYPE: Most dealers have voiced a complaint of insufficient quantities of "Gem Type". On the other hand, they appear to require MS-65 plus coins at current MS-65 bids. The only major change this week was in BU and Proof Three cent nickels in MS-65. Both issues backed off as a few small lots were offered under bid.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $396.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.
